TOOLS REQUIRED

- Screwdriver
- Masking Tape
- Hole punch
- Hammer
- Permanent marker
- Electric Drill
- 1/8 and 5/16 drill bits
- Utility knife or scissors
- Torque wrench

INSTALLATION

- Step 1 Assemble C5ZZ-FIREX-MNT and FIREX-MNT-DAG or FIREX-MNT-S-DAG with hardware provided. Install fire extinguisher with FIRE-CLMP-L-DAG clamp kit or equivalent. Place assembly where desired on vehicle. Make sure seat adjustment handle has clearance. Support extinguisher end as needed. See Photo 1.
- Step 2 Place masking tape on carpet to show where bracket will be located when installed. See Photo 2.
- Step 3 Remove seat by unbolting nuts located on the underside of vehicle. See Photo 3.
- Step 4 Extinguisher and quick release mount may be removed to accommodate the next steps, but is not required.
- Step 5 Lift carpet and place bracket where desired, using masking tape as a guide. Mark desired hole locations using a black marker. For best results, locate holes in center of slots. See Photo 4.
- Step 6 Center punch holes as shown. See Photo 5.

IS_SD-C5ZZ-FIREX-MNT

- Step 7 Drill 1/8" pilot holes through one layer of sheet metal. Increase drill size incrementally until drilling final hole size of 5/16". If screws are hard to start, it may be necessary to drill slightly larger. File sharp edges of holes. See Photo 6.
- Step 8 Place bracket over holes and install sheet metal screws provided. Snug bracket to floor pan. See Photo 7.
- Step 9 Temporarily reinstall seat and check location of bracket. It will be beneficial to reinstall extinguisher and quick release bracket if removed. See Photo 8.
- Step 10 Adjust location as necessary. Remove seat and tighten sheet metal screws. See Photo 9.
- Step 11 Cut carpet as needed to overlay mounting bracket. See Photos 10 & 11.
- Step 12 Reinstall seat, torquing screws to factory spec.
